

Phase 02 • Build

Make a real product with AI.

FOUNDER'S NAME _____

START DATE _____

Hey, founder! Now you stop being just a user of technology and become a builder with it. For your grade band, a parent drives the keyboard and owns the accounts, but every prompt, every design choice, and every decision comes from YOU, said out loud. Work the tasks in order inside each mission.

1 • In order

Do the tasks inside each mission in order, top to bottom.

2 • Evidence or it didn't happen

Every task's proof goes in your Founder File, labeled with the task number.

3 • Yes or no

A parent checks the "Done when" line and initials it. If you're debating, the answer is "not yet."

MISSION MAP • PHASE 02 • BUILD • 5 MISSIONS, 26 TASKS

- | | | |
|------------------------------|--|---------|
| ☐ 2.1 | Ship a working product with a live link, a price, and instructions | 5 tasks |
| ☐ 2.2 | Explain in a one-page brief how your product fills a gap in something you know | 5 tasks |
| ☐ 2.3 | Contact 40 customers; launch marketing with a number to beat | 6 tasks |
| ☐ 2.4 | Ship a version 2 that answers feedback from at least three real users | 5 tasks |
| ☐ 2.5 | Present a 3–5 minute live demo: the build, the results, and the lessons | 5 tasks |

Your Founder File

On Day 1, set up one binder or folder called your **Founder File**. Every task's proof (logs, posters, photos, videos) goes in it, labeled with the task number. If the evidence isn't in the file, the task isn't done. By the end, the Founder File *is* your portfolio.

The Family Demo Session

Every other Saturday (or so), hold a **Family Demo Session**: a real event on the family calendar, phones down, audience assembled. This is where your demos, pitches, and presentations happen. Treat it like opening night, because it is.

The pencil rule

Work two or three blocks a week. Go at mastery speed, not calendar speed; fast or slow, both are on First Profit. Check a box only when the **Done when** line is true. When in doubt, the answer is "not yet," and that's fine. It just isn't done yet.

Ship a working product with a live link, a price, and instructions

☐ 2.1.1 Write your product plan

Half a page: who it's for, what it does, what it will cost, and what "working" means for version 1. You say it, a parent types it, and you draw the product too!

DONE WHEN (PARENT CHECKS): The plan is in your Founder File and you can say who it's for and what it does in one breath.

PARENT INITIALS _____ DATE _____

☐ 2.1.2 Set up your AI toolkit

With a parent, choose your AI building tools and set up accounts (the parent owns the accounts; that's the rule). Then do one 15-minute practice build together to learn the tool. Parent drives the keyboard; YOU say every prompt out loud.

DONE WHEN (PARENT CHECKS): Tools are chosen, accounts work, and the practice build exists.

PARENT INITIALS _____ DATE _____

☐ 2.1.3 Build version 0.1

Build your first rough version, enough that a parent can click it, use it, or hold it. The parent types the prompts you make up. Every design decision is YOURS.

DONE WHEN (PARENT CHECKS): A parent used v0.1 for two minutes without you touching it, and a screenshot or photo is filed.

PARENT INITIALS _____ DATE _____

☐ 2.1.4 Add the price and the how-to

Put the price and simple "how to use this" instructions right into the product itself.

DONE WHEN (PARENT CHECKS): A stranger opening your product would know what it costs and how to use it; a parent reads it cold to check.

PARENT INITIALS _____ DATE _____

☐ 2.1.5 Go live, and test from outside

Your parent publishes it to a live link (or a public order page for a physical product). Then YOU test it on someone else's device, on a different network.

DONE WHEN (PARENT CHECKS): The live link loads on someone else's device, the link is logged, and a parent confirms the price and instructions show up.

PARENT INITIALS _____ DATE _____

★ COMPLETES THE MISSION

Explain in a one-page brief how your product fills a gap in something you know

☐ 2.2.1 Map what you know

List three things you know really well: a sport, a game, a hobby, a subject, your community. Pick one.

DONE WHEN (PARENT CHECKS): The list of three, your pick, and one sentence on why are in the Founder File.

PARENT INITIALS _____ DATE _____

☐ 2.2.2 Hunt for the gap

Find proof of a real annoyance in your domain: talk to three people who share it (a parent sits in; YOU ask the questions), or list five specific frustrations from your own experience.

DONE WHEN (PARENT CHECKS): The raw proof (interview notes or your frustration list) is in the file.

PARENT INITIALS _____ DATE _____

☐ 2.2.3 Say the gap in one sentence

Squeeze all your proof into one sentence: "People who ___ struggle to ___ because ___."

DONE WHEN (PARENT CHECKS): The sentence is written, and a parent can repeat the gap back correctly after hearing it once.

PARENT INITIALS _____ DATE _____

☐ 2.2.4 Write the one-page brief

One page with four parts: your domain, your proof, your gap sentence, and exactly how your product fills the gap. You dictate, a parent scribes, and the words are yours.

DONE WHEN (PARENT CHECKS): The brief fits on one page and has all four parts.

PARENT INITIALS _____ DATE _____

☐ 2.2.5 The outside-reader test

Someone who isn't family reads your brief cold, then says back the gap and your solution. Fix the brief until their say-back is right.

DONE WHEN (PARENT CHECKS): Their correct say-back is witnessed by a parent, and the final brief is filed.

PARENT INITIALS _____ DATE _____

★ COMPLETES THE MISSION

Contact 40 customers; launch marketing with a number to beat

☐ 2.3.1 Build the 40-name list

With a parent, list 40 real possible customers and a way to reach each. Booth passers-by count when logged one by one. Parent finds most names; YOU sort who's most likely to buy.

DONE WHEN (PARENT CHECKS): The 40-row list exists and every channel is parent-approved for safety.

PARENT INITIALS _____ DATE _____

☐ 2.3.2 Write the message, and get it approved

Draft what you'll say, one version per channel. Your parent stamps it APPROVED with the date before ANYTHING is sent. No exceptions.

DONE WHEN (PARENT CHECKS): Approved, dated scripts are in the Founder File.

PARENT INITIALS _____ DATE _____

☐ 2.3.3 Contact 1-20

Make your first twenty contacts. Parent sends the messages you composed; YOU handle in-person ones. Track each: date, who, channel, response.

DONE WHEN (PARENT CHECKS): Rows 1-20 are complete.

PARENT INITIALS _____ DATE _____

☐ 2.3.4 Contact 21-40, and tally

Finish the list! Then count the four numbers: contacted → replied → interested → bought.

DONE WHEN (PARENT CHECKS): All 40 rows are complete; the four-number tally is at the bottom.

PARENT INITIALS _____ DATE _____

☐ 2.3.5 Make your marketing piece; pick its number FIRST

One flyer, poster, short video, or post. BEFORE launching, write the one number that means "it worked" (scans, replies, visits, sales) and the number to beat. You design; a parent produces.

DONE WHEN (PARENT CHECKS): The finished piece and its pre-declared number-to-beat are in the file.

PARENT INITIALS _____ DATE _____

☐ 2.3.6 Launch, measure, decide

Launch it and let it run 1-2 weeks. Read your number, then write three sentences: result vs. target, why, and what you'd change.

DONE WHEN (PARENT CHECKS): The number you got and your three sentences are in the Founder File.

PARENT INITIALS _____ DATE _____

★ COMPLETES THE MISSION

Ship a version 2 that answers feedback from at least three real users

☐ 2.4.1 Watch three real users

Three real people try your product while you watch SILENTLY and notice where they get stuck, confused, or quit. (One can be a family member for your grade band.) Right after each session, tell a parent what you saw so they can write your notes down.

DONE WHEN (PARENT CHECKS): Three sets of watching-notes are in the Founder File.

PARENT INITIALS _____ DATE _____

☐ 2.4.2 Turn notes into a top-3 fix list

Turn what you saw into a list of possible improvements. Rank them, then pick your top three. Each pick must trace back to a real moment where a user got stuck.

DONE WHEN (PARENT CHECKS): The ranked list exists, and each top-3 pick points to a specific user moment.

PARENT INITIALS _____ DATE _____

☐ 2.4.3 Build the three changes

Make the three changes with your AI tools. The parent drives the tools; YOU direct each change and check it matches the user note. Keep a simple before/after change log.

DONE WHEN (PARENT CHECKS): All three changes work, and the change log (what changed, which user caused it) is filed.

PARENT INITIALS _____ DATE _____

☐ 2.4.4 Ship version 2, live

Publish v2 to your live link, replacing v1. Parent publishes, same rules as before.

DONE WHEN (PARENT CHECKS): V2 is live and a parent confirms each of the three changes is visible and working.

PARENT INITIALS _____ DATE _____

☐ 2.4.5 Close the loop with your users

Tell all three users what changed because of THEM (through parent-approved channels). At least one tries v2 and confirms your change fixed their problem.

DONE WHEN (PARENT CHECKS): The thank-you messages and one user's confirmation are in the Founder File.

PARENT INITIALS _____ DATE _____

★ COMPLETES THE MISSION

Present a 3–5 minute live demo: the build, the results, and the lessons

☐ 2.5.1 Outline your demo

Four parts: the gap (from mission 2.2), a live tour of your product, your numbers (from mission 2.3), and three lessons about building. A picture storyboard is perfect.

DONE WHEN (PARENT CHECKS): The one-page outline (or storyboard) is in the Founder File.

PARENT INITIALS _____ DATE _____

☐ 2.5.2 Rehearse against the clock

Practice with the REAL, live product (not screenshots!) until two runs in a row land between 3 and 5 minutes. A parent can run the device while you present.

DONE WHEN (PARENT CHECKS): Two timed clean runs are logged (parent writes down the times).

PARENT INITIALS _____ DATE _____

☐ 2.5.3 Stage your Family Demo Session

Put a Family Demo Session on the calendar at least three days ahead. Invite your audience: your household adults plus at least ONE non-family adult.

DONE WHEN (PARENT CHECKS): The invitation is sent and the session is on the family calendar.

PARENT INITIALS _____ DATE _____

☐ 2.5.4 Deliver the demo, and take questions

Present live, product running, 3 to 5 minutes. Then take at least two audience questions and answer them all by yourself.

DONE WHEN (PARENT CHECKS): The demo ran live within time, and you answered both questions alone (parent verifies).

PARENT INITIALS _____ DATE _____

☐ 2.5.5 Record it and file it

Video the demo (or record the call). File it with your outline and one sentence: your single biggest lesson about building.

DONE WHEN (PARENT CHECKS): The video and your lesson sentence are in the Founder File.

PARENT INITIALS _____ DATE _____

★ COMPLETES THE MISSION

Phase 02 · Build: Complete!

Every task above is initialed and dated, and every piece of evidence is in the Founder File. We checked, no debating!
